-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Couffet et al.(U.S.Pat.5,397,877) in view of Maeyama (U.S.Pat.6,195,525). Couffet discloses a device for the homogeneous inductive heating of metallic flat products on the move that discloses many of the features of the claimed invention but fails to show magnetic deflectors. Maeyama discloses an electromagnetic induction heating device and image recording device using the same that shows using magnetic deflectors interior to an inductive heating coil. It would have been obvious to one of ordinary skill at the time of the claimed invention to use deflectors as taught by Maeyama in the device of Couffet so as to reduce the number of required coil windings.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Leonard, Witzman, Witzman'591, Dubs, Larkin and Holcombe are cited to show structure similar to the claimed invention.
